Mercury Systems Launches Latest Intel-based Rugged XMC

February 15, 2018

BuiltSAFE™ MFCC-8570 Enables Easy Upgrades for Avionics and Communications

ANDOVER, Mass., Feb. 15, 2018 (GLOBE NEWSWIRE) -- Mercury Systems, Inc. (NASDAQ:MRCY) (www.mrcy.com) announced today the BuiltSAFE™ MFCC-8570 single board computer (SBC) based on the Intel® Core™ i7 Gen5 processor. Delivered as a conduction-cooled switched mezzanine card (XMC), the MFCC-8570 provides an easy upgrade to previous XMC SBCs while preserving the system and sensor I/O built into the host motherboard or I/O carrier.

The Intel Core i7 Gen5 5850EQ processor includes Iris Pro 6200 graphics, making the MFCC-8570 ideal for airborne display processors and video server applications. With turbo boost up to 3.4 GHz for each of four cores, the CPU also enables high-performance airborne and ground-based applications such as flight computers, mission computers, data links, and ground stations for unmanned aerial vehicles (UAVs), helicopters, and a variety of fixed-wing aircraft.

Mercury's MFCC-8570 Single Board Computer is ideal for avionics display processors or video server applications.

"The MFCC-8570 provides best in class performance per watt," said Greg Tiedemann, Director of Product Management. "This fills out our Intel-based SBC product line providing customers a choice of XMC, 3U OpenVPX™, and 6U OpenVPX depending on their size constraints."

The MFCC-8570 SBC expands the processing product portfolio for the BuiltSAFE ROCK-2 3U OpenVPX avionics subsystem that also includes graphics, video, I/O, storage, and chassis. The MFCC-8570 can be combined with safety-certifiable SBCs in a multi-level safety ROCK-2 subsystem to provide the optimal mix of high DAL-level certification and highest performance on a function-by-function basis.

Mercury Systems – Innovation That Matters™

Mercury Systems (NASDAQ:MRCY) is a leading commercial provider of secure sensor and safety-critical processing subsystems. Optimized for customer and mission success, Mercury's solutions power a wide variety of critical defense and intelligence programs. Headquartered in Andover, Mass., Mercury is pioneering a next-generation defense electronics business model specifically designed to meet the industry's current and emerging technology needs. Forward-Looking Safe Harbor Statement

This press release contains certain forward-looking statements, as that term is defined in the Private Securities Litigation Reform Act of 1995, including those relating to fiscal 2018 business performance and beyond and the Company's plans for growth and improvement in profitability and cash flow. You can identify these statements by the use of the words "may," "will," "could," "should," "would," "plans," "expects," "anticipates," "continue," "estimate," "project," "intend," "likely," "forecast," "probable," "potential," and similar expressions. These forward-looking statements involve risks and uncertainties that could cause actual results to differ materially from those projected or anticipated. Such risks and uncertainties include, but are not limited to, continued funding of defense programs, the timing and amounts of such funding, general economic and business conditions, including unforeseen weakness in the Company's markets, effects of any U.S. Federal government shutdown or extended continuing resolution, effects of continued geopolitical unrest and regional conflicts, competition, changes in technology and methods of marketing, delays in completing engineering and manufacturing programs, changes in customer order patterns, changes in product mix, continued success in technological advances and delivering technological innovations, changes in, or in the U.S. Government's interpretation of, federal export control or procurement rules and regulations, market acceptance of the Company's products, shortages in components, production delays due to performance quality issues with outsourced components, inability to fully realize the expected benefits from acquisitions and restructurings, or delays in realizing such benefits, challenges in integrating acquired businesses and achieving anticipated synergies, changes to cyber-security regulations and requirements, changes in tax rates or tax regulations, changes to generally accepted accounting principles, difficulties in retaining key employees and customers, unanticipated costs under fixed-price service and system integration engagements, and various other factors beyond our control. These risks and uncertainties also include such additional risk factors as are discussed in the Company's filings with the U.S. Securities and Exchange Commission, including its Annual Report on Form 10-K for the fiscal year ended June 30, 2017. The Company cautions readers not to place undue reliance upon any such forward-looking statements, which speak only as of the date made. The Company undertakes no obligation to update any forward-looking statement to reflect events or circumstances after the date on which such statement is made.
