

Mercury Systems Earns IPC-1791 Qualified Manufacturer's Certifications

January 12, 2021

Receives coveted "Trusted Supplier" designation; only U.S. OEM with multiple sites certified

ANDOVER, Mass., Jan. 12, 2021 (GLOBE NEWSWIRE) -- Mercury Systems Inc. (NASDAQ: MRCY, www.mrcy.com), a leader in trusted, secure mission-critical technologies for aerospace and defense, announced that three of its manufacturing locations received IPC-1791 certifications, earning a place on the [IPC Qualified Manufacturer's Listing](#) (QML) as a Trusted Supplier. Mercury is the only OEM in the U.S. to have multiple sites certified to the IPC-1791 standard with two in Hudson, N.H. and one in Phoenix, Ariz.

IPC-1791 QML is a facility-level certification based on a "Trusted Electronic Designer, Fabricator, and Assembler Requirements" standard. IPC standards help ensure superior quality, reliability, and consistency in electronics manufacturing. To achieve the status as a trusted source and supplier, manufacturing facilities are vigorously vetted and undergo an intensive audit process to help optimize product quality, reliability, and consistency across the entire supply chain. Stringent requirements for this certification include reviews of a company's product and quality systems, supply chain risk management system (SCRM), security system, including compliance to export control laws (ITAR and EAR), and chain of custody system (ChoC).

"Having earned the QML for our three locations validates Mercury's commitment to delivering high quality, reliable products to our customers," said Amir Allahverdi, senior vice president, Mercury. "We are part of a global network of trusted sources that the industry will look to first and foremost when evaluating potential business partners."

Mercury received its first certification in December 2019 at its Phoenix facility and was one of only ten companies in the U.S. at that time to achieve accreditation as a Trusted Supplier. Since then, Mercury has invested significantly to earn multiple site certifications and designations and is committed to earning more.

"Different from other audit programs, IPC's validation services program uniquely provides technical and in-depth assessments of products and processes in accordance with IPC standards," said Randy Cherry, IPC director of Validation Services. "We are pleased to especially recognize Mercury Systems for becoming a member of IPC's network of trusted QML suppliers."

Operating at the intersection of high-tech and defense, Mercury Systems is the leader in making trusted, secure mission-critical technologies profoundly more accessible. Our work is inspired by our Purpose of delivering Innovation That Matters, By and For People Who Matter, to make the world a safer, more secure place for all. Forward-Looking Safe Harbor Statement

This press release contains certain forward-looking statements, as that term is defined in the Private Securities Litigation Reform Act of 1995, including those relating to the products and services described herein and to fiscal 2021 business performance and beyond and the Company's plans for growth and improvement in profitability and cash flow. You can identify these statements by the use of the words "may," "will," "could," "should," "would," "plans," "expects," "anticipates," "continue," "estimate," "project," "intend," "likely," "forecast," "probable," "potential," and similar expressions. These forward-looking statements involve risks and uncertainties that could cause actual results to differ materially from those projected or anticipated. Such risks and uncertainties include, but are not limited to, continued funding of defense programs, the timing and amounts of such funding, general economic and business conditions, including unforeseen weakness in the Company's markets, effects of epidemics and pandemics such as COVID, effects of any U.S. federal government shutdown or extended continuing resolution, effects of continued geopolitical unrest and regional conflicts, competition, changes in technology and methods of marketing, delays in completing engineering and manufacturing programs, changes in customer order patterns, changes in product mix, continued success in technological advances and delivering technological innovations, changes in, or in the U.S. Government's interpretation of, federal export control or procurement rules and regulations, market acceptance of the Company's products, shortages in components, production delays or unanticipated expenses due to performance quality issues with outsourced components, inability to fully realize the expected benefits from acquisitions and restructurings, or delays in realizing such benefits, challenges in integrating acquired businesses and achieving anticipated synergies, increases in interest rates, changes to industrial security and cyber-security regulations and requirements, changes in tax rates or tax regulations, changes to interest rate swaps or other cash flow hedging arrangements, changes to generally accepted accounting principles, difficulties in retaining key employees and customers, unanticipated costs under fixed-price service and system integration engagements, and various other factors beyond our control. These risks and uncertainties also include such additional risk factors as are discussed in the Company's filings with the U.S. Securities and Exchange Commission, including its Annual Report on Form 10-K for the fiscal year ended July 3, 2020. The Company cautions readers not to place undue reliance upon any such forward-looking statements, which speak only as of the date made. The Company undertakes no obligation to update any forward-looking statement to reflect events or circumstances after the date on which such statement is made.
