Mercury Computer Systems Announces Name Change to "Mercury Systems"

New Name Reflects Breadth of Company's Product and Solution Offerings Along the Sensor Processing Chain

CHELMSFORD, Mass., Nov. 13, 2012 (GLOBE NEWSWIRE) --Mercury Computer Systems, Inc. ([MRCY](#)) (www.mrcy.com), a best-of-breed provider of commercially developed, open sensor and Big Data processing systems for critical commercial, defense and intelligence applications, today announced that the Company has changed its name to Mercury Systems, Inc. to better reflect the breadth and depth of its capabilities. The name change is effective immediately and the company's common stock will continue to be listed on the NASDAQ Stock Market and trade under its current ticker symbol: "MRCY." In addition, the company adopted a new slogan, "Innovation That Matters™," revealed a new corporate logo, and changed its website to www.mrcy.com, as part of a complete rebranding campaign.

Mark Aslett, Mercury Systems' President and CEO, commented, "For over 30 years, we have been delivering best-in-class embedded processing technology to our Prime contractor customers. That will never change, nor will our single-minded focus on providing the best solutions, value, services and support for our customers. Today, we deliver a broader set of sensor processing solutions than ever before and now with our expanded capabilities in RF and microwave, we are better poised to meet the sensor processing and big data processing challenges in the defense industry and Intelligence Community. We believe that 'Mercury Systems' clearly represents these expanded capabilities more accurately and reflects our evolution to a strategic, strong, nimble, trusted partner to Prime contractors and other key customers."

Mercury Systems' new slogan, "Innovation That Matters," reflects its commitment to innovate with a purpose. "When we talk about innovation, we mean innovation that is developed with the specific purpose of helping us solve tough problems for our customers, often under conditions that are difficult to the extreme," Aslett continued.
