Mercury Systems Receives Small Business Award from Lockheed Martin

Company's Microelectronics Secure Solutions group recognized for operational excellence while delivering high quality products

Lockheed Martin annually evaluates small businesses delivering strategic goods and services critical to the success of the Missiles and Fire Control business. Candidates are judged on predefined criteria, including product quality, operational metrics, and commitment to continuous improvement. Of the thousands of small business suppliers evaluated, Mercury was one of only 32 companies privileged to receive this award.

"This prestigious award is a testament to Mercury's unwavering commitment to innovation and continuous improvement in all aspects of our business to ensure our valued customer's success," said Mercury's Charlie Leader, Senior Vice President and General Manager of the Advanced Microelectronics Solutions group. "We are honored to continue supplying Lockheed Martin with cost-effective, SWaP-optimized microelectronics solutions to support our military forces around the globe."

Forward-Looking Safe Harbor Statement

This press release contains certain forward-looking statements, as that term is defined in the Private Securities Litigation Reform Act of 1995, including those relating to the products and services described herein. You can identify these statements by the use of the words "may," "will," "could," "should," "would," "plans," "expects," "anticipates," "continue," "estimate," "project," "intend," "likely," "forecast," "probable," "potential," and similar expressions. These forward-looking statements involve risks and uncertainties that could cause actual results to differ materially from those projected or anticipated. Such risks and uncertainties include, but are not limited to, continued funding of defense programs, the timing and amounts of such funding, general economic and business conditions, including unforeseen weakness in the Company's markets, effects of continued geopolitical unrest and regional conflicts, competition, changes in technology and methods of marketing, delays in completing engineering and manufacturing programs, changes in customer order patterns, changes in product mix, continued success in technological advances and delivering technological innovations, changes in, or in the U.S. Government's interpretation of, federal export control or procurement rules and regulations, market acceptance of the Company's products, shortages in components, production delays or unanticipated expenses due to performance quality issues with outsourced components, inability to fully realize the expected benefits from acquisitions and restructurings, or delays in realizing such benefits, challenges in integrating acquired businesses and achieving anticipated synergies, increases in interest rates, changes to export regulations, increases in tax rates, changes to generally accepted accounting principles, difficulties in retaining key employees and customers, unanticipated costs under fixed-price service and system integration engagements, and various other factors beyond our control. These risks and uncertainties also include such additional risk factors as are discussed in the Company's filings with the U.S. Securities and Exchange Commission, including its Annual Report on Form 10-K for the fiscal year ended June 30, 2016. The Company cautions readers not to place undue reliance upon any such forward-looking statements, which speak only as of the date made. The Company undertakes no obligation to update any forward-looking statement to reflect events or circumstances after the date on which such statement is made.
